25X1

1. At the Gdynia Shipyard, three slip ways were observed with vessels under construction. At the outfitting pier, there were four newly-built merchant vessels, each of 1,500 to 2,000 DWT; they were all of the same type with the engine aft, and they appeared to be almost finished. A vessel of about 10,000 DWT, which according to a report was purchased [] was being repaired. In a floating dock with about 10,000 tons lifting capacity, assembly of sections of a vessel was taking place.
2. On the south pier of the free port basin, there were about 300 five-ton Czechoslovak trucks which were waiting to be shipped to China. In the northern portion of the same pier, there is an area which contains oil tanks above ground.
